

Quick Quest – Proposal Document

The document explains current challenges universities are facing and how Quick Quest can address those efficiently.

SrushtiSoft

Introducing Quick Quest

Organizing question-answer banks and generating quality question papers in a format required by your university can be very time-consuming and labour intensive. Grading these papers consumes a lecturer's life and stops you from getting through the mountains of research and class preparation you really need to be doing. The solution can be found using this educator assistant software, which both greatly eases this burden while at the same time increases the quality of your question papers themselves.

Quick Quest is a powerful program that assists educators in organizing a subject specific question-answer bank and generating question papers in a customizable format. If your institute is spending more than one hour engaging more than one educator to prepare a question paper, then you should seriously consider Quick Quest and experience how it accelerates your work with greater efficiency. Any education institute worldwide can use this software to prepare «Equally Distributed Complexity» question papers. The program is quick, easy and intuitive and comes with an excellent track record, having been used at a number of universities and colleges with highly positive results.

Manual Question Paper Generation Process at a Glance

The Process

1. Get set of questions from different faculties from different place.
2. A committee, which scrutinizes and consolidates all questions sent by all faculties and generates 3 or more prototype question papers.
3. Another or same committee, which scrutinizes prepared question papers and come up with a question paper which is mixture all 3 or more prototype question papers.
4. A person or a committee has responsibility to review the final question paper.

The Resource Consumption

Analysis of Minimal Manual effort involved in generating 'ONE' question paper:

Time

Minimum 1 to 2 weeks of time needs to be spent on each question paper.

Money

All manual activities incur cost to the university. This happens every time whenever there is a need of 'new' question paper generation.

Competency

Sometimes no guaranty of 100% competency in question papers. It observed that students commenting question is too complex or too easy.

Organize

Managing and organizing many people/committees by providing suitable allowances adds expense to the university .

What to Expect from a Software Solution?

- Should takes very less time to generate new question paper.
- Zero expense on each question paper generation.
- 100% competency and quality.
- No people/committee/resource maintenance while generating new question paper.
- Should be secured and confidential
- An easy, secured and windows based system, which can be used by any individual with no or very less training.

Quick Quest – Concept

Top 3 Goals

- Carry-out most time consuming tasks ‘only once’ and make use of same effort for several years.
- Avoid manual involvement during question paper generation to maintain security and competency.
- Question Paper generation process should be less than 5 minutes job!! This helps to take control on question paper ‘out’ scams by generating brand new paper in the last minute.

Efficient Solution

Quick Quest – came up with an intelligent solution to ease the process of Question collections and Question Paper generation.

One Time Work

- Collect all questions and enter into the system, which internally maintains questions bank.
- Scrutinize, improve and rate question’s complexity.
- Design any kind of question paper format.

Every time Work

- Generate question papers with automatic equal distribution of complex, medium and easy questions.
- Allow comparison of newly generated question paper with old ones
- Lock the newly generated question paper till the exam completion.

What are other Helping Factors

Creating unrepeated questions paper by managing question bank with adequate privacy can be challenging and time-consuming. Not only the effort repeats for every subject and examination, it also costs considerably and there is always a worry of disclosure of question papers before the examination date.

Quick Quest automates whole process, eliminate risk to confidentiality and prepare question papers in almost any format. Every new creation of question paper is with new set of questions and equally competent as its predecessor.

Quick Quest Features

Meet the most generic and advanced question paper generation software for any institute in world.

Different user access levels

Defend question papers and answers bank against unauthorized access. Control user operations through different user account types. Quick Quest provides administrator, data entry operator and guest user account types.

Quickly create question papers

High performance question paper creator engine analyse thousands of questions and produce competent exam question papers in the format recommended by your examination board.

Scan questions rather typing them all

The integrated Optical Character Recognition (OCR) engine help convert scanned text images (TIFF and JPEG files) to editable text and automatically import in Question entry window.

Local language support

The rich text format support in Quick Quest offer storing text entered in your local language. Quick Quest can integrate with your favorite local language software.

Quickly generate answer papers for evaluation

Generate answer papers for a question paper. Print multiple copies and distribute to the staff when evaluating student answer sheets.

Store unlimited questions and answers

No matter how big question and answer bank you want to manage, Quick Quest is always ready. Experience the limitless possibilities.

Integrated spell check

Use in-built spell check feature for error free question and answer texts.

No training required to use Quick Quest

Experience the ease of use as you do with your version of Microsoft Windows®.

Save question with images and equations

The smart question and answer entry window in Quick Quest support saving complex text content.

LAN and Cloud Edition Support

Setup Quick Quest for multi-user access. Manage questions and answers in distributed environment and accelerate the work.

Create impressive formatting texts

Use your favourite document editing software to create finest formatted text content and save back in Quick Quest.

Track users activity and control access

Even when you are not looking over your users shoulders, you can still track their activities more effectively.

Control user access to a particular subject and isolate them from rest of the information.

Question bank status report

More questions in the bank help to generate unrepeated question papers and therefore timely monitoring of question bank health is important.

Check question counts on different levels (subject, course period, department, institution wise).
